CSS

C++

JavaScript

HTML

Python

React

Personal Projects

Personal E-Portfolio Site

- Used knowledge of HTML, CSS, and JavaScript to create a personal website used to show off other projects I have worked on and link to my other profiles.
- Dynamically programmed in order to support other devices such as phones and tablets.
- Has an integrated email contact system and toggle button for a dark theme option.

Mock E-Commerce Site

- Used knowledge of HTML, CSS, JavaScript and React to create a mock e-commerce website.
- Fully functional with sorting options, pricing, animations, and shopping cart.
- Dynamically coded to support other devices such as phones or tablets.

C++ Blackjack Game

- Used knowledge of C++ to create a working blackjack game played against a dealer that obeys standard blackjack rules.
- Tracks player bets and balances, has simple logic for things such as dealer drawing cards and "Ace" card scenarios.
